

## Approved High-Strength-Steel Welding Wire

Supersedes Additional High-Strength-Steel Welding Wire Approved, issued June 2019; See information highlighted in **yellow**

### REVISION SUMMARY

Some information was removed and revised.

The below options are high-strength steel welding wires that are approved for use on Honda vehicles.

Product Name	Supplier	Contact Info
Bohler Union X96	Pro Spot Honda Snap-on	<a href="https://prospot.com">https://prospot.com</a> <a href="https://honda.snapon.com">https://honda.snapon.com</a>
Titan Technology EQ-5029X96	Equip Automotive	<a href="http://www.equipmyshop.com">www.equipmyshop.com</a> or call <b>(866) 362-4400</b>
Washington Alloy Eagle-Arc 980X	<b>Washington Alloy Co.</b>	<a href="http://www.weldingwire.com">www.weldingwire.com</a> or call <b>(888) 522-8296</b>

### NOTE

Bosch DS980J has been discontinued, but can still be used.

All three options have a wire size of **0.8 mm (0.030 inch)** in diameter and are used for welding joints in high-strength-steel of **590 MPa** and higher. You can also use them for welding lower grade steel but are not necessary to provide the required strength.
